

Our Ohana (Family) has been busy this spring and I have many exciting updates! Ohana One released

Hello

digital report or watched the wonderful and informative video, I encourage you to do so as together they really provide a concise and detailed overview of Ohana One's programs and our accomplishments over the past year. Below you will be able to learn more about our relief efforts in Ukraine and our ongoing partnerships with Vuzix and TeleVu. Both companies joined us in our humanitarian efforts in Ukraine when we sent

our 2021 annual report and the Ohana One Journey Video. If you haven't read the interactive, cool,

20 pairs of donated glasses and software to military hospitals and private hospitals to assist the surgeons treating the badly injured. We also facilitated the shipment of 5000 pounds of medical equipment, medical supplies and baby food in partnership with a special donor. Ohana One is so grateful for the support of our donors and community whom have made these efforts possible! Last month we said good-bye to our Business Development Associate Key Pearson as she moved on to

graduate school at USC. We are grateful for all she contributed and wish her all the best in educational journey. We also welcomed Sidra Bugsch to the team as our new Office Administrator, and Flávia Cavicchioli as our new intern. They have both been wonderful additions to the team. Over the past few months Susan Popler and Jeanne Bray have also been working with us and they have been integral to

some recent projects. We haven't yet formally welcomed them, and I am pleased to do today. There are some exciting new partnerships and projects under development, and I hope to be able to share them with you soon. Something I am able to share is that Ohana One has been working with three of our partner orgs - InterSurgeon, Global Initiative for Children's Surgery (GICS), and Foundation For International Education In Neurological Surgery (FIENS), to offer strategic development support over the past few months. It is exciting to be able to share our deep expertise and work collaboratively with their leadership to help strengthen our global surgical community.

Below you can read about the continued growth of our Surgical Sight Program, and the program's expansion into new specialities. There is also information about the upcoming Ohana One surgical missions planned for this August to Mozambique and Ethiopia. I hope you enjoy reading our newsletter as much as we enjoyed creating it for you!

come from outside the medical profession.

What aspect of Ohana One are you most proud of?

Best,

Marchelle Sellers **Executive Director New & Notable**

Last month, Ohana One Surgical Consultant Eva Williams, MD, MPH, presented her Ohana One poster "Implementation of a Smartphone Application to Provide Global Plastic Surgery Education and Mobile Electronic Medical Records" at CSPS in San Diego. The kiosk moderators from UCSF and UC Irvine led an excellent discussion. The group had great questions and they discussed challenges Ohana One has faced, future directions, and how mentors/mentees are able to develop trust in one another during their time in the program!

On a sunny day in May, some special Ohana One supporters gathered at the lovely home of Board

Ohana One now serves seven specialties: Plastic and Reconstructive Surgery, General + Colorectal Surgery, Urological Surgery, Neurological Surgery, Orthopedics Surgery, OBGYN, and Cardiothoracic

Member Arron & Cami Bregman to hear about Ohana One's impact on global surgical education. It was a fantastic afternoon, and we are delighted to share some of the photos form the day with you

VICE PRESIDENT OHANA ONE

Hi, my name is Adrian Ashkenazy. I am the current Vice President of the Ohana One Board of Directors. I view my role on the board as helping to provide the perspective of a non-medical

professional into the daily operations and mission statement of our charity in the hopes that as we continue to develop our mission we will be more effective in communicating our ideas to folks that

I am most proud of the fact that a very small group of people with just a shadow of an idea, three years ago, were able to marshal their resources — matched with their determination — to create a charitable

surgeons, and the interest of so many well-established players in the NGO space who are impressed with what we're doing. What do you hope to see Ohana One accomplish this year? This year I hope Ohana One can build upon it's existing foundation to create more scale. For example, our partnership with InterSurgeon is particularly promising in that it has the ability to generate a countless number of mentor/mentee surgeons and so my hope is that Ohana One can fulfill the

I wish people understood what an outsized contribution Ohana One is making to the global health marketplace. I think that there are a lot of other organizations that have been around for a very long

organization that is living and breathing and making a substantial contribution to global health. I think it's astounding that in only three years we have a full platform, full team, 100 mentee/mentor

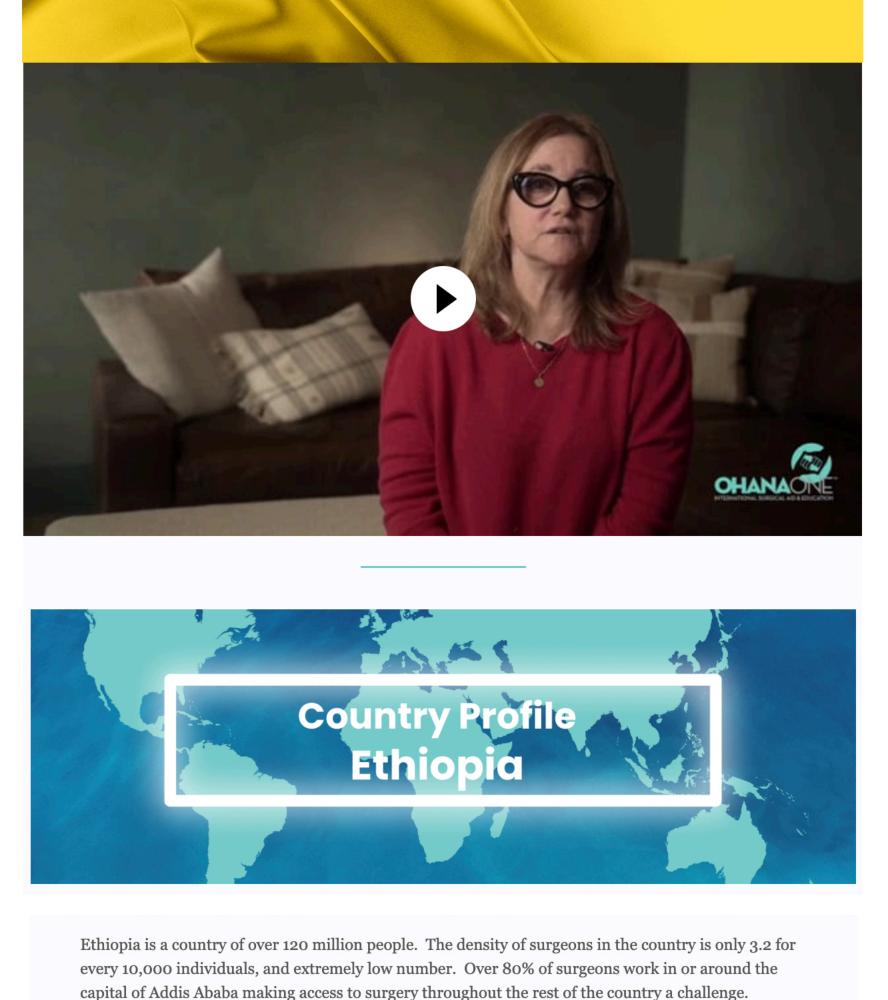

time and have done extremely good work in the space of global health. What I think is a little-known fact to most people is what an amplifying force Ohana One is for organizations that have already plowed such substantial resources into global health. It is my hope that the people that inhabit the

promise of what relationships like that represent.

What do you wish people knew about Ohana One?

NGO space of global health come to realize how impactful Ohana One's mission is as a part of their own mission statements. Read the full interview here.

Your \$100 donation provides access to one remote training call which in turn impacts that surgeon's skills and expertise over their career. That \$100 is multiplied by each surgery and each positive outcome that results from the training. Your donation, of any amount, creates better surgical outcomes, and healthier patients. These healthier patients, in turn, can be more economically productive and more engaged with their families (which is priceless). Really, to say that \$100 turns into a million is likely underestimating the impact of your donation. Your gift will impact the lives of thousands and improves the economic outlook for
